

Potential Guitarists for the Upcoming Project

The following list of the “100 Greatest Guitarists” is from Rolling Stone. As you would expect, the list is very contentious. It is heavily skewed towards rock and blues guitarists. Most guitarists on the list are also American and English men. It does not include important and influential guitarists like Django Rhinehart, Andre Segovia, Sister Rosetta Tharpe, Brad Paisley or Habib Koite, to name a few. So, while there are many guitarists to choose from here, it should not limit you.
